

Patented W-Cut[™] Thread Design & Zip Tip

- NO pre-drilling
- NO hassles
- NO strip drive
- Reduced splitting
- Easy start

The W-Cut[™] is a patented thread design which acts like a saw blade, cutting through any fibrous materials with ease. This unique design reduces the amount of torque required to install the screw, and maintains a high pull out strength. By cutting through, rather than pressing fibers aside, the W-Cut[™] also reduces material splitting.

The W-Cut[™] design is available on all GRK screws 1 1/4" and longer, except Top Star[™]. GRK's Zip Tip is designed for fast starts in any fibrous materials.
